

GENERATION

L

LEADERS

For those who are **leaders on and off the court.**

They perfectly **manage emotions** and have a great ability to **determine their goals** and objectives.

They **help** those at their side to **achieve success.**

Free, nonconformist, **creative spirits** and they **don't follow the rules...**

They play sports to have fun, release themselves and go beyond.

Padel is the time of the day where they feel free and fulfilled.

OUTSIDERS

S

KINGS

The **kings of the court.**

Strong personalities, with **cheeky attitudes.**

They take the initiative, they like to feel like **protagonists.**

“The brand of the next generation of players”

K

MANIFESTO

WE ARE BORN OUT OF EMOTION, ENERGY AND OUR **PASSION** FOR PADEL. OUR **ACCENT** STANDS FOR PLAYERS FROM ALL OVER THE WORLD WHO SHARE THE SAME **VALUES**.

WE SEEK NEW **CHALLENGES** ON A DAY TO DAY BASIS. LOOKING AHEAD, ENJOYING AND CELEBRATING EVERY MOMENT, **EVERY POINT**. IF YOU LIKE TO **TAKE RISKS** **ON** AND **OFF** THE COURT, YOU ARE **ONE OF US**.

TO NEW STORIES TO TELL, **EXPERIENCE** TO LIVE, AND MEMORIES TO CHERISH. WE ARE MORE THAN READY TO WHAT'S **COMING** NEXT!!!

HARDWARE

 **HYPE** | ATTACK AND NEVER LOOK BACK

FOR AGGRESSIVE PLAYERS WITH BOLD ATTITUDE & POWERFUL PLAY THAT DON'T HESITATE TO TAKE THE INITIATIVE AND RESPONSIBILITY AND ARE FEARLESS TO ACCELERATE THE BALL TO HIT WINNERS

 **FLOW** | KEEP CALM & LET IT FLOW

FOR THOSE PLAYERS WITH TOUCH AND FINESSE PLAY THAT SLOWLY COOK THE POINT WITH MEASURED & CONTROLLED SHOTS AND TAKE OUT THEIR OPPONENTS WITH PRECISION

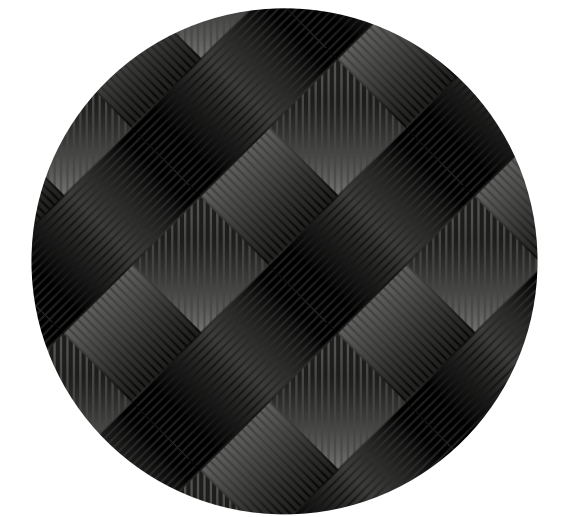

FIBERS

In the *Generation TWO* collection we work the carbon in **three different planes**. Thanks to this technology we can adjust the **bond angles** of the fiber layers to achieve the right flexibility.

CUSTOM EVA

CUSTOM EVA

Our *Generation TWO* rackets have a **unique rubber** that has an **excellent memory capacity**, which helps the player to obtain greater power at the moment of impact.

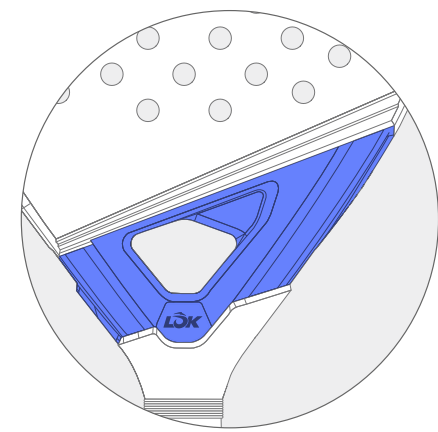

Memory is the ability of the rubber to recover its initial position in a shorter time after a ball impact. Thanks to its density, this rubber adapts to any player.

**NEW BLACK
RUBBER**

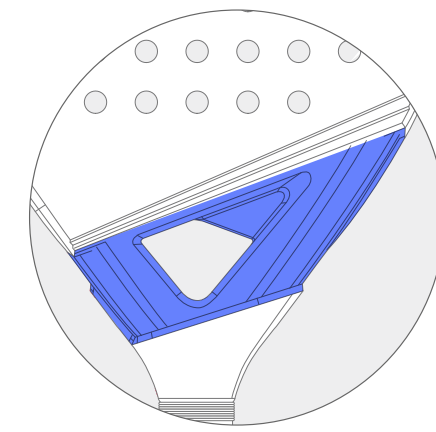

ASYMMETRIC HEART

Our heart is the emblem of our rackets and is distinguished by its **asymmetrical design** while maintaining a **perfect balance**.

MAXX

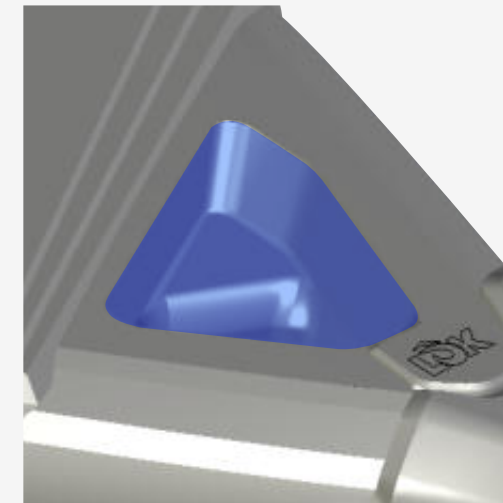

CARB-ON
EASY

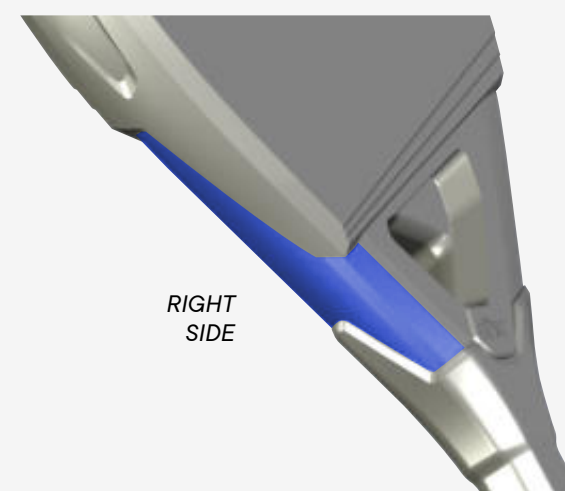

NEW HEART!
BE

We have four different types of hearts depending on the models in the collection.

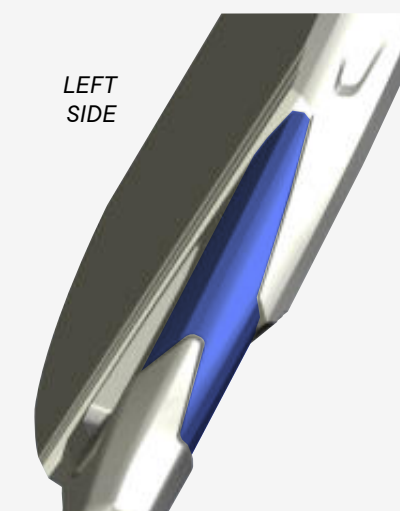

Its unique and original shape creates some **lateral steps** that form the **nerve** of the heart, offering a structural rigidity that provides stability and is key to achieving optimal balance.

Among other features, *Asymmetric Heart* allows increasing the speed of the ball in the swing by giving more power to the shot.

GRADUAL FACE

Our rackets have a system of **stepped layers** generated in the upper and lower parts of the faces.

Gradual Face are steps and reliefs that generate angles that will help reduce vibration as it moves across the entire surface at the moment of impact.

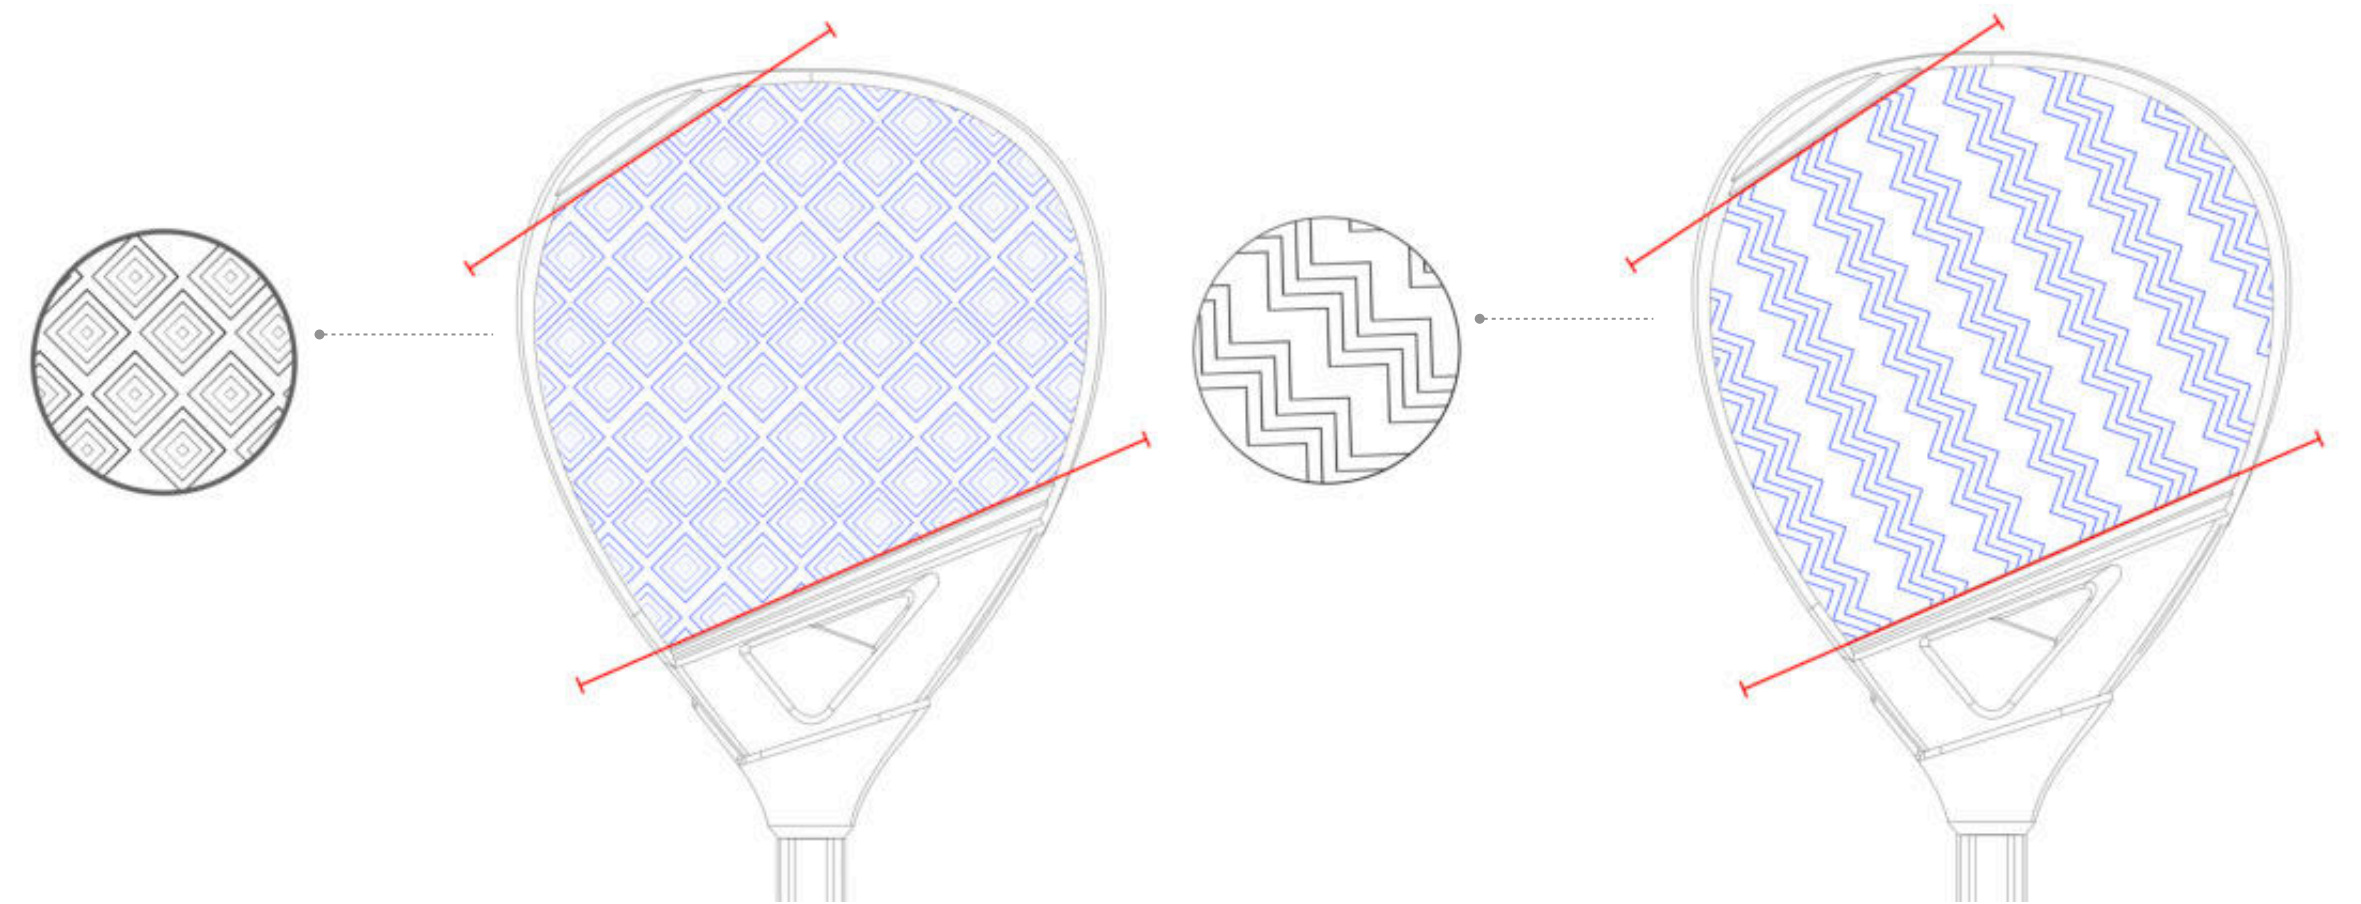

This vibration is produced from the point of impact moving to both the top and bottom of the face, places where the technology is present.

New 3D SPIN LINES

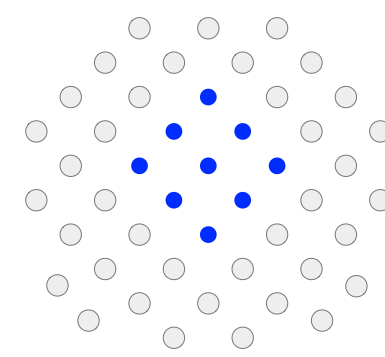

The *3D Spin Lines* system increases the rotation of the ball when it impacts the racket, thus increasing spin and improving the feeling of control.

It consists of a system of squares and wave lines angles to improve the sensation of handling.

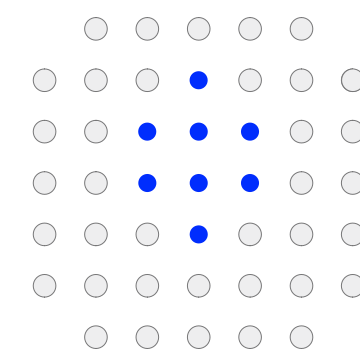

DYNAMIC HOLES SYSTEM

A progressive layout with two different hole sizes -10 and 11mm- in the central part of the face to help power the shot.

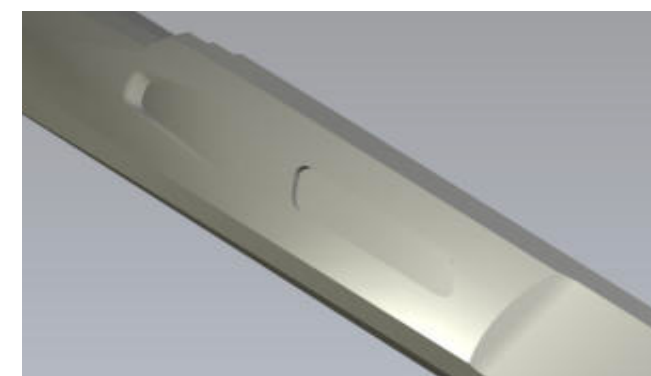

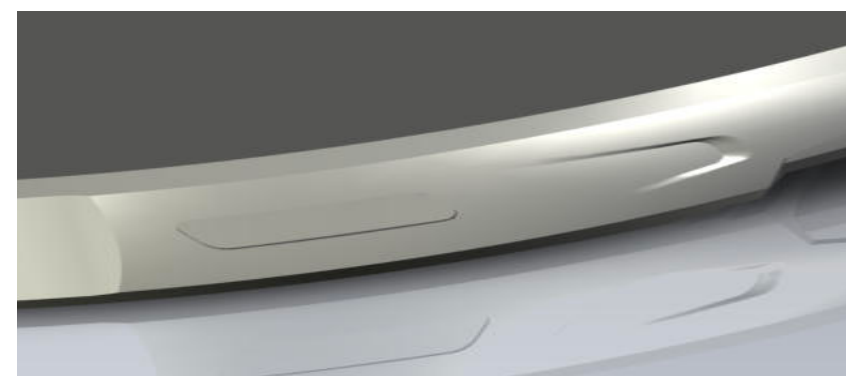

MAXX

CARB-ON

VIBRATION GROOVE

Rail inserted in the frame of the blade to help dissipate vibrations caused by the impact of the ball. The rail incorporates a PU finish to maximize its function.

COMFORT WRISTBAND

The racket has an adjustable wrist strap that accompanies the string to provide comfort in the grip, whatever the necessities and preferences of the player.

It has a reinforced layer and a softened inner part for maximum comfort, and a design with the brand's claim.

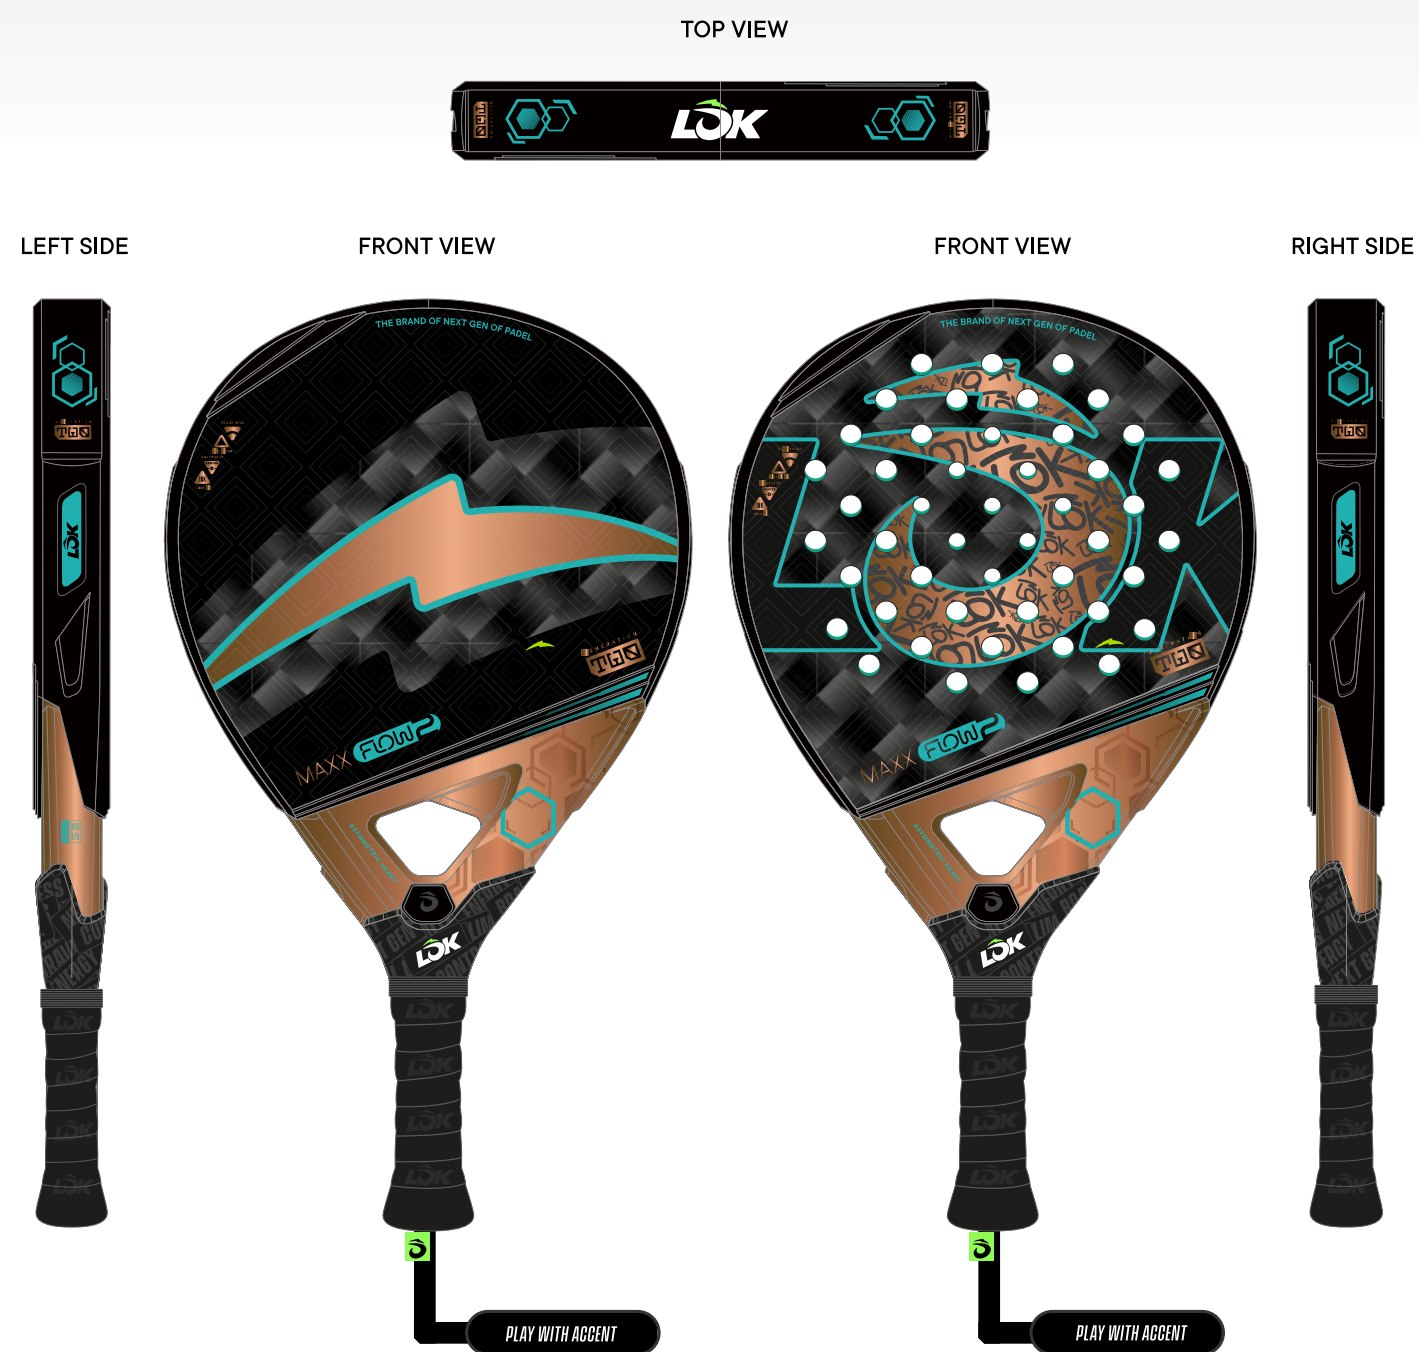

CARBON REINFORCEMENT

Carbon reinforcements in different critical points of the racket as structural support to contribute to durability.
